## About me

Proactive student in Data Science Engineering with experience in data extraction and automation using tools such as Selenium and AWS. Throughout my career, I have managed script migration projects and honed my data analysis skills through academic projects. I am ready to contribute significantly with my knowledge and innovative solutions as a data analyst and engineer.

## Experience

### Freelance

Iquique, Chile

Technical Support - Data Engineer

June 2024 – 2024 September

- Data extraction using Selenium to collect information from multiple sources.
- Automation of the processing of extracted data for integration into AWS, improving operational efficiency.
- Migration of scripts to newer versions, enhancing code efficiency and compatibility.

### Jumbo

Iquique, Chile
